

CYTOVALE PATENT STATEMENTS

Updated March 2023

This posting serves as notice under 35 USC §287(a) that the Cytovale® System and IntelliSep® test are covered by the following US patent(s). The content of these lists and association between products and patents may change due to events including, but not limited to: filing, publication, issuance, licensing, product changes, expiration, abandonment, and other circumstances. Additional patent application(s) may be pending. Products may be sold individually or as part of a system.

PRODUCT	PATENT NUMBER	TITLE
Cytovale® System and IntelliSep® test	US8,935,098	Method and device for high throughput cell deformability measurements
	US9,151,705	System and method for deforming and analyzing particles
	US9,638,620	System for deforming and analyzing particles
	US9,464,977	System and method for deforming, imaging and analyzing particles
	US9,897,532	Method and device for high throughput cell deformability measurements
	US10,107,735	System and method for deforming and analyzing particles
	US10,295,455	System and method for deforming and analyzing particles
	US10,252,260	System and method for deforming particles
	US11,548,003	System and method for determining an immune activation state
